| Germany

SUMMARY

Data Scientist with 3+ years of professional experience designing, building, and deploying end-to-end AI and machine learning solutions. Skilled across the full ML lifecycle — data collection, cleaning, feature engineering, model training and evaluation, and production deployment — using Python, SQL, and cloud platforms (AWS, Azure, GCP) with Docker and Kubernetes. Experienced building BI dashboards and automating recurring data workflows to support business decision-making. Currently completing a Master's in Data Science.

EXPERIENCE

Data Scientist — End-to-End AI, ML & Data Solutions

02/2022 - 03/2025

Cognizant Technology Solutions India Pvt. Ltd | Hyderabad, India

- Delivered end-to-end AI and machine learning projects, from data collection and feature engineering to model training, evaluation, and deployment.
- Built and automated data pipelines and reporting workflows using Python and SQL, reducing manual effort and improving delivery speed.
- Implemented, deployed, and scaled applications in cloud and containerized environments using Docker and Kubernetes across AWS, Azure, and GCP.
- Applied statistical methods and machine learning techniques to extract insights, identify patterns, and inform business decisions.
- Built and maintained Power BI dashboards, translating complex analysis into clear, actionable insights for stakeholders.
- Developed and optimized SQL queries and stored procedures, improving data retrieval and reporting performance.
- Partnered with cross-functional stakeholders to translate business requirements into practical, scalable technical solutions.
- Documented queries, models, and workflows thoroughly to ensure solutions remained maintainable and easy to hand over.

PROJECTS

AI-Based Classification & Recommendation Application

Python | Machine Learning | Streamlit | AWS

- Built an end-to-end AI application — from data integration and feature engineering to a deployed, production-style interface.
- GitHub: github.com/pranai-777 | Live app: pranai-7.streamlit.app

Global AI Job Market & Skills Demand Dashboard

Python | Pandas | Matplotlib | Seaborn | Streamlit

- Built and deployed a data pipeline analyzing real-world job market data, surfacing skill demand, salary, and hiring trends.
- GitHub: github.com/pranai-777/Global-Job-Market-Dashboard | Live: global-job-market-dashboard-777.streamlit.app

Operational Analytics Dashboard

Power BI | SQL-Driven Reporting

- Built a KPI-driven Power BI dashboard with DAX and Power Query to analyze workforce data and support management reporting.
- GitHub: github.com/pranai-777/HR-Analytics-Dashboard

SKILLS

Programming: Python, SQL, JavaScript, Rust

AI & Machine Learning: End-to-End ML Pipelines, Feature Engineering, Model Training & Evaluation, Statistical Analysis

Cloud & DevOps: AWS, Azure, Google Cloud Platform (GCP), Docker, Kubernetes

BI & Visualization: Power BI, DAX, Power Query, Matplotlib, Seaborn

Collaboration: Requirements Translation, Stakeholder Communication, Cross-Functional Collaboration, Documentation

Languages: English, German

EDUCATION

Master of Science — Data Science (in progress)

03/2025 - 02/2027

University of Europe for Applied Sciences | Germany
